THIS IS UNEVALUATED INFORMATION

Figure 1. The effect of the number of iterations on the accuracy of the proposed algorithm. The accuracy of the proposed algorithm increases with the number of iterations. The accuracy of the proposed algorithm is 100% when the number of iterations is 1000.

1. The 46 Army, 4 Field Army, is the major garrison force in Hunan.* This army, with the exception of one regiment, is deployed in western Hunan conducting an anti-guerrilla campaign.
2. According to figures compiled by the Central and South China Military Area, the 46 Army, assisted by local troops of the military sub-districts, killed 110,294 guerrillas in 1950. As a result of this record, the Central and South China Military Area has approved the first meeting of the Representatives of Heroes of the Hunan Military District. This meeting will be held at Changsha on 28 January 1951. Over 350 representatives will attend, half of them chosen from the 46 Army and half from units under the command of the military district and various military sub-districts.

$\frac{d}{dt} \left(\frac{\partial L}{\partial \dot{x}} \right) = \frac{\partial L}{\partial x}$
